

UVA PIPELINES & PATHWAYS SKILL BUILDING 101 WORKSHOP SERIES

2025 Pipelines & Pathways

**ENHANCE YOUR
SKILLS. ADVANCE
YOUR CAREER.**

Join us for the **UVA PIPELINES & PATHWAYS SKILL BUILDING 101 WORKSHOP SERIES**. Through these in-person workshops, you will receive industry certificates that will make you more competitive in the job market. All of the workshops are **FREE AND OPEN TO THE PUBLIC**. You may attend more than one workshop, but **REGISTRATION IS REQUIRED**. Please be sure to attend the classes you register for, as seating is limited.

ALL CLASSES WILL BE HELD AT **VA CAREER WORKS** (944 GLENWOOD STATION LANE, SUITE 103, CHARLOTTESVILLE) FROM **10:00AM TO 12:30PM**, WITH THE EXCEPTION OF MARCH, WHICH WILL BE HELD FROM **1:00PM TO 5:00PM**.

OSHA BLOODBORNE PATHOGENS (BBP) - HEALTH & SAFETY IN THE WORKPLACE

Provides a concise overview of OSHA's Bloodborne Pathogens standard, focusing on preventing occupational exposure to infectious materials. Covers key safety practices, protective measures, and compliance procedures to ensure a safe workplace, reducing the risk of bloodborne diseases.

FUNDAMENTALS OF SERVING SAFE FOR FOOD HANDLERS

This course teaches you about the fundamentals of safe food handling and different ways to prevent food contamination. It also discusses global efforts concerning food safety and the role of the ServSafe certification program. Once completing the course, you will be equipped with the knowledge needed for the ServSafe exam.

FUNDAMENTALS OF OSHA 10 HOURS PROGRAM FOR INDUSTRIES

This course summarizes OSHA's basic safety regulations, focusing on identifying and preventing workplace hazards. Participants will learn about OSHA's role, key safety standards, and the rights and responsibilities of employers and employees, equipping them to contribute to a safer work environment. This prepares individuals to sit for the OSHA 10 test.

PHLEBOTOMY, VENIPUNCTURE, AND SPECIMEN HANDLING

This course explores venipuncture techniques, venous anatomy, and effective patient communication. It delves into specimen handling, labelling, and preservation, emphasizing quality assurance, accurate documentation, and accreditation. This is ideal for individuals interested in phlebotomy, specimen management, and other lab roles with UVA Health.

BASIC LIFE SUPPORT (BLS)

This course covers the basic steps in administering cardiopulmonary resuscitation (CPR) and basic life support measures (BLS) to adults, children, and infants. It also discusses various first-aid maneuvers, the use of automated external defibrillators (AEDs), and how to open patients' airways. The course qualifies you to gain international accreditation that signals your ability to save lives in a crisis.

HEALTHCARE CLEANING, DECONTAMINATION, AND WASTE MANAGEMENT

This course explains waste management as a critical aspect of safeguarding health and safety in healthcare settings. It starts with fundamental concepts, moving on to codes, schedules, and equipment to maintain a sanitized workplace. The course also covers decontamination and disinfection processes, as well as hygiene and PPE basics for the healthcare industry.

ESSENTIAL MEDICAL TERMINOLOGY—PART 1

This course builds essential vocabulary, covering word structure, body systems, diagnoses, and specialty terms. It is perfect for clear communication and effective patient care, with practical, real-world applications that boost confidence in any healthcare setting. Excellent for those interested in Earn While You Learn programs. **To receive a certificate, participants must also take Essential Medical Terminology—Part 2 on May 22nd.**

HOUSEKEEPING TASKS AND PROCEDURES

Guests at hotels, resorts and other hospitality locations expect a clean, safe and welcoming environment. This makes cleaning and housekeeping essential functions you can use to enjoy a rewarding career in the hospitality industry. This course discusses how to perform vital cleaning tasks and provides practical housekeeping skills used in the hospitality industry, including duties, equipment, procedures, and linen maintenance.

ESSENTIAL MEDICAL TERMINOLOGY—PART 2

This course builds essential vocabulary, covering word structure, body systems, diagnoses, and specialty terms. It is perfect for clear communication and effective patient care, with practical, real-world applications that boost confidence in any healthcare setting. Excellent for those interested in Earn While You Learn programs. **To receive a certificate, participants must also take Essential Medical Terminology—Part 1 on April 24th.**

PATIENT SAFETY AND DUTY OF CARE

This course is for aspiring healthcare professionals who are seeking to deepen their understanding of care obligations. From mastering informed consent to implementing risk assessments and ensuring effective communication, this course equips you with the skills to navigate the complexities of care with confidence and integrity. This course helps prepare individuals for Earn While You Learn program and the Patient Companion role.
